

FOOT VALVE SYRINGE DISPENSER

INCREASED PRODUCTION - ECONOMIC DISPENSING

Jensen Global's JGDFV25 and JGDFV25V foot valves are purely pneumatic valve pedals that include a built-in regulator and gauge to control the flow of materials and simple step-to-activate design built inside a protective housing. JGDFV25V has all the features of the JGDFV25 plus a built-in-vacuum venturi regulator which allows pullback of material into the dispensing tip, reducing dripping and stringing of the material.

The foot pedal sits under the work bench, is foot activated and designed for areas where electricity is prohibited.

They are an economical way to ergonomically dispense materials. Flow is controlled by the operator's foot. Output is determined by set air pressure, viscosity of material, and gauge size of dispensing tip.

FEATURES

- Push-to-lock regulator
- Rubber cushion pad on pedal
- Quick push-to-connect inlet for 1/4" or 5/32" adapter hose

WHAT'S INCLUDED

- JGDFV25 (standard) or JGDV25V (vacuum pullback)
- Reducer fitting for 5/32" OD tubing adapters
