

V.i.S ver 2.50 Professional

An affordable gateway to transfer PC/ Notebook into the most versatile digital video image analysis, measurement and management system

Live video and capture image (or Video Recording)

A set of powerful Measurement tools

Auto Label

Manual Label

- Auto / Manual Measurement Result
- Export data to Excel, HTML and many more

Image Processing & Analysis Tools

Tool Type	Distance	Width	Height	Angle	Radius	Area	Perimeter	Unit
1	Diameter	1.95	2.11					mm
2	Width	2.40						mm
3	Pitch	5.81	5.69	1.16				mm
4	Angle			63.96				Deg
5	Angle			76.95				Deg
6	Angle			67.89				Deg

Reports

- Drag & Drop Operation
- Easy Flexible
- Image Annotation Tools
- User report templates
- Export report to common image format and share with others easily.

Image Drawing Tools

Brush Settings

Foreg. Color: [Color Picker]

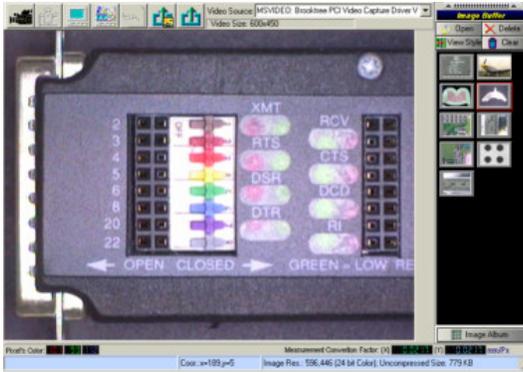

Backg. Color: [Color Picker]

Font: [Font Selector]

Fill Color:

Image Management

- Image Archiving: JPG, BMP, JPEG2000 and many more.
- Image Buffer, user image buffer and image album.
- Different Thumb view Style
- Drag & Drop within image buffer, working space, report etc.

Live Video / Image Acquisition

- Selectable video source standard, NTSC/ PAL/ SECAM, or Digital Camera (USB or Firewire (IEEE 1394))
- Supports WDM and VFW driver using Microsoft DirectX
- True color video overlay display - 16/24/32 bit Color
- Video or Image capturing size up to 1280x1024
- Real time/Live image enhancement, e.g. brightness & HSV
- Save captured image as jpg, jpeg2000, ,bmp, tiff, gif, pcx, png and more, and video as avi format.

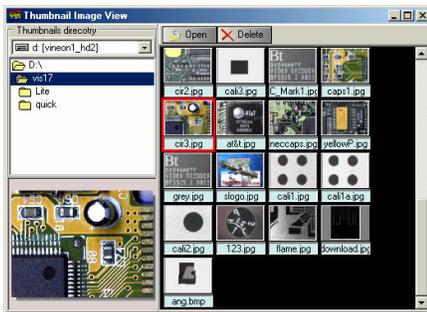

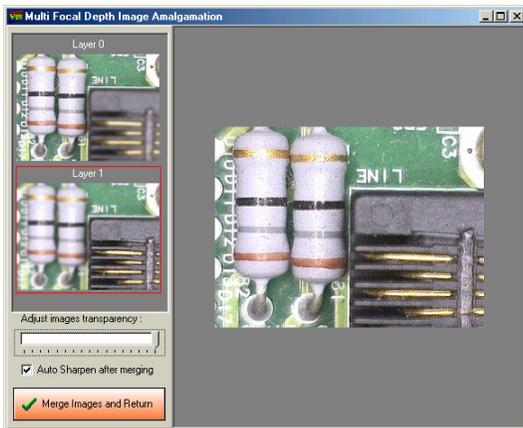

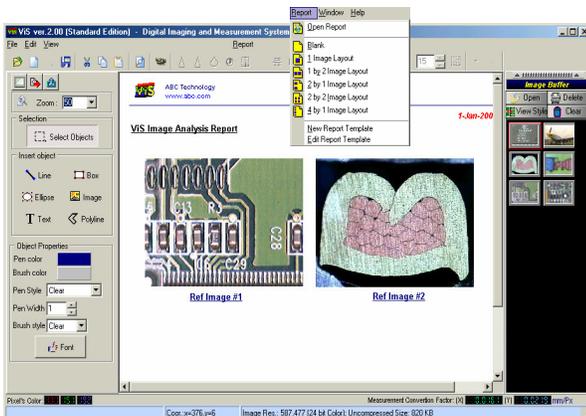

Image Buffer, Album and painting

- Drag and Drop operation
- Image buffer for storing temporary images (unlimited image)
- Different image buffer view
- Image Album for image archiving
- A set of Image annotation tools

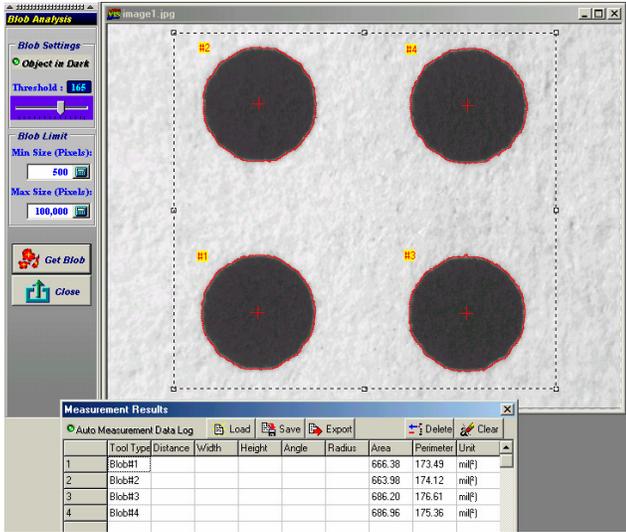

Images Amalgamation

- Combine images at different focal depth into a full focus image.
- Adjustable focus or transparent level

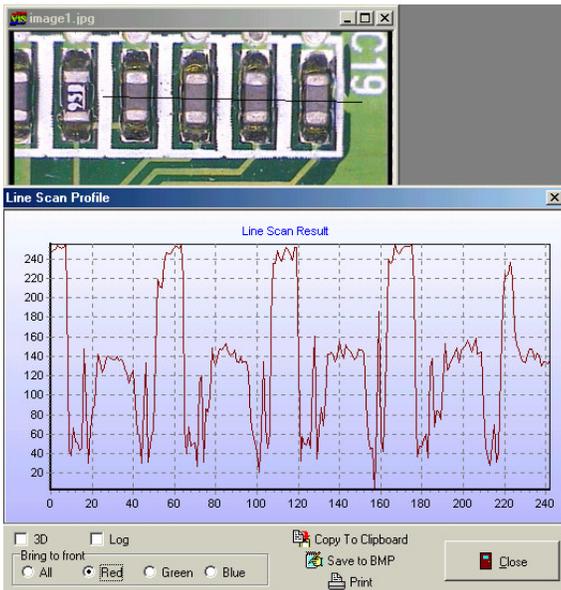

Reporting (with template)

- Drag and drop report design – drag and drop image from image buffer into the report easily
- A set of report annotation tools, i.e. line, circle, text etc.
- User can design different report template.
- Pre-configured report style with different layout that ease the job of laying out the images.
- Report exportable to standard image format like PDF, BMP, JPG for sharing with others

Object / Blob Analysis

- Using blob analysis technique to detect every object/particle in the ROI automatically.
- Measures area/size and perimeter/border for every object.
- Preview threshold image
- Object filtering with object area/size limit settings.

Pixels Profile

- Plot profile chart for pixels along the line drew by the user.
- View pixels' R,G,B or all profile
- Chart can be printed or saved as BMP.

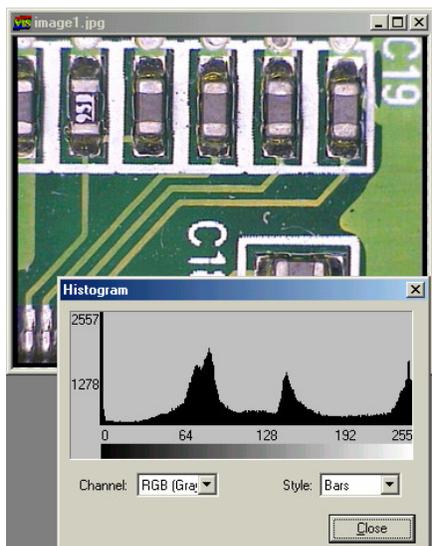

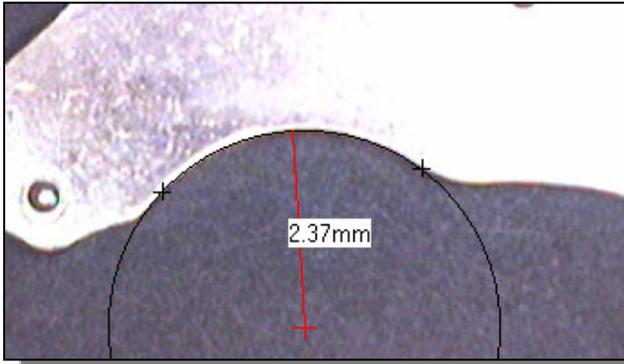

Image Histogram

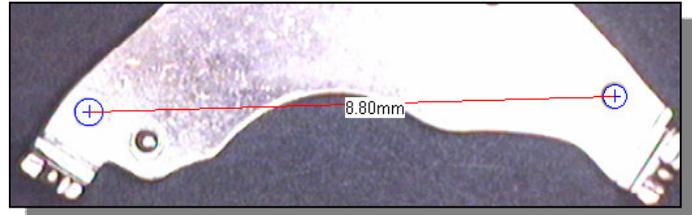

- Plot histogram chart for the image area within the ROI selected by user
- Histogram for R,G,B or RGB (Gray).

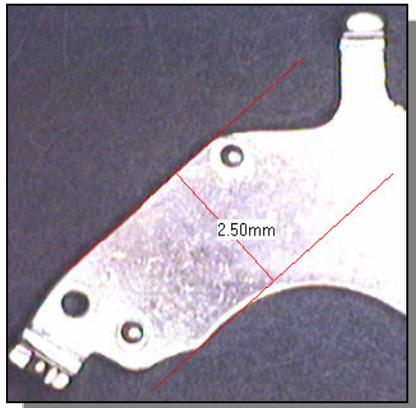

ViS ver2.0 Pro provides a set of powerful Measurement tools

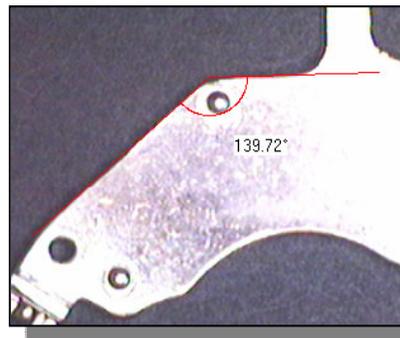

Measure Radius of an Arc with easy 3 point clicks

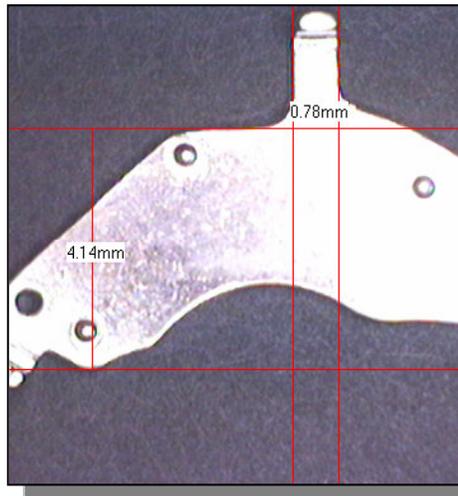

Measure pitch or distance between two holes or objects.

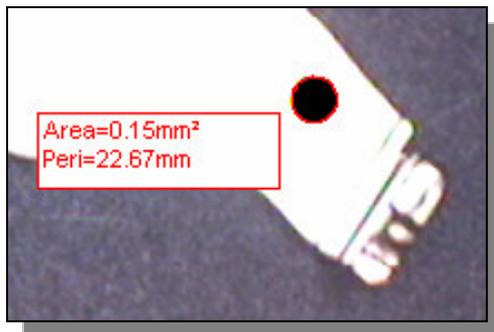

Perpendicular lines distances

Measure Angle

Measure width, length and others

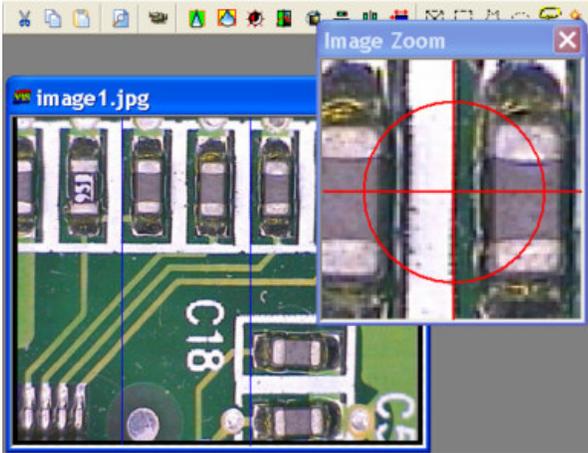

Measure area (object size) and Perimeter of an object with one click auto area measurement (**Blob analysis**) or object counting

Measurement Results									
Auto Measurement Data Log									
	Tool Type	Distance	Width	Height	Angle	Radius	Area	Perimeter	Unit
1	Angle				140.38				Deg
2	Pitch	9.07	9.06	0.39					mm
4	Perpen.	2.69							mm
5	Perpen.	2.62							mm
6	Width		5.31						mm
7	Area						0.14	22.61	mm²

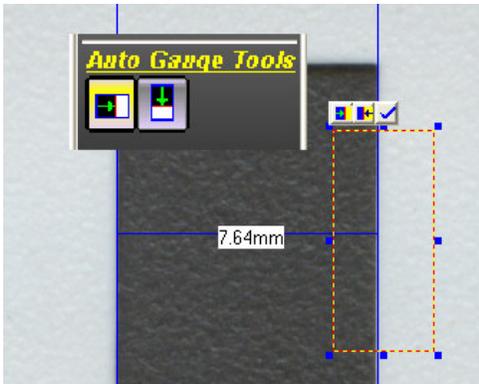

Measurement results can be saved in the results sheet and export to other format like Excel, text, html etc.

AND other measurement tools...

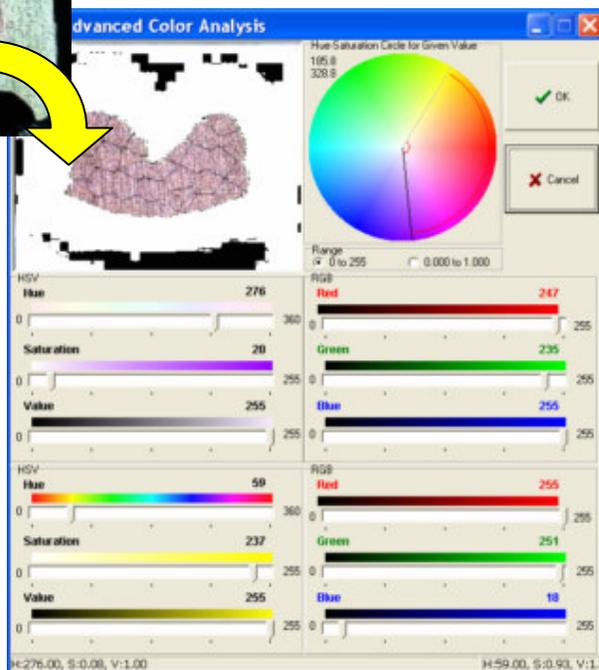

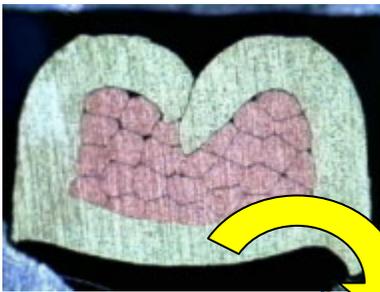

Magnifier View for Measurement

- Real Time Image Zoom/Magnifier view on the mouse pointer for measurement
- To improve measurement cycle time and accuracy
- View with cross-hair

Auto Edge Finder Tools for Measurement

- Automatically find edges with 1 click for width and length measurement
- To improve measurement cycle time and accuracy

Advanced Color Analysis

- To analyze the image color in RGB and HSV
- To filter image color with RGB and HSV range filter
- Interactive HSV mapper for user to select the color range.
- After color filtering, image objects size and perimeter can be measured via blob analysis.
